**DEVI™**  
Heating Systems

**DEVI™**  
Heating Systems

# Experience comfortable, luxurious warm floors all year round with an under floor heating system from DEVI.

DEVI Heating Systems use radiant heat to warm your home. Rather than blow hot air around the house, DEVI under floor heating provides a pleasant warmth for your feet and body by warming the floor surface. The perfect finishing touch to any room in your home.

Under floor heating goes particularly well under hard floor surfaces, making it ideal for bathrooms, kitchens and open entertaining areas. In addition, under floor heating is hidden from view and does not take up valuable space. Due to the very gentle air circulation, the amount of travelling dust particles is reduced considerably, which is naturally a great relief for people with allergies or asthma.

Using DEVI Thermostats allows you to heat specific rooms or areas independently or program them to automatically meet your weekday and weekend lifestyle.

Pure comfort is far from the only reason to choose DEVI under floor heating. DEVI offers flexibility, durability, minimal energy consumption and comes with a warranty that is second to none.

*Devimats™ are self-adhesive, easy to work with and achieve favourable results in almost every situation.*

## Why choose DEVI Heating Systems?

- ✓ Total comfort heating
- ✓ No ducts, radiators or vents
- ✓ Hidden from view and does not take up valuable space
- ✓ Can be applied under almost all hard surfaces
- ✓ Minimal energy consumption
- ✓ 10 year warranty on cables and mats
- ✓ Reliable service
- ✓ After sales service and support
- ✓ Approved to Australian Standards
- ✓ Maintenance free
- ✓ Silent and safe
- ✓ Easy and inexpensive to install
- ✓ Mirror heaters, heated towel rails, ceiling heating and heating panels also available

## DEVI™ - The Leading Brand

DEVI has been involved in the heating industry since 1942, beginning the production of heating cables in the early sixties. DEVI is the worlds largest specialist electric heating cable supplier, offering a complete range of floor heating products worldwide.

DEVI's intelligent floor sensing thermostats ensure accurate temperature control with minimal energy use

## Floor Heating Options

### In Slab Heating

In Slab 'storage' heating is suitable for one room or the whole house, providing economical warmth. It can be installed under just about any floor covering available such as carpet, timber, tiles, stone as well as polished and tinted concrete floors.

### In Screed Heating

In Screed 'demand' heating can be installed on top of new or existing concrete or timber floors. Cables are embedded into a 20-25mm thick sand and cement screed bed. It can be installed under most floor coverings including carpet, timber, tiles and stone.

### Devimat™

Devimat™ is a 'no-step' system which delivers warmth on demand. It can be installed almost anywhere, even on top of an existing tiled floor, and is designed to be laid directly under tiles in the adhesive bed.

### Devicell™

Devicell™ insulation panels are recommended for use under manufactured floating timber floors. The panels' polystyrene insulation ensures that any heat loss downwards is minimized and its aluminium surface ensures a uniform distribution of heat transfer to the timber floor.

### Other DEVI Products

DEVI also offers a comprehensive range of thermostats and other heating options and accessories.

### Thermostats include:

- Devireg™ 130 Wall Mounted Thermostat Series
- Devireg™ 330 DIN Rail Mounted Thermostat Series
- Devireg™ 530 Recess Mounted Thermostat Series
- Devireg™ 535 Programmable Clock Thermostat

### Some other products include:

- Comfortline™ Ceiling Heating Panels
- Slimline Ceiling Heating Panels
- Mirror Heaters
- DEVI™ Heated Towel Rails
- Ceiling Heating Foils
- Devitemp™ Fan Heaters
